## NEW - MONARCH

### Lightweight Tactical Hunter

The Monarch LTH 501 and 501S knives. "High Speed, Low Drag" classic lockback design features a drop point Skinner blade with false edge made of Swedish stainless (the 501S features partial Spyder Edge® serration). This high performance blade is coupled to fiber-reinforced nylon (ZYTEL) interframe handle that is strong & lightweight. Checkered KRATON inserts provide a comfortable, secure, non-slip grip. They have a heavy duty lock spring and an opening disk instead of a thumb lug. The unique opening disk work well with this size of knife and provides increased mechanical advantage and ambidextrous operation.

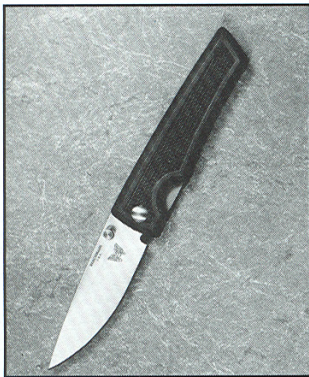

The Monarch LTH is a well thought out and executed folding knife that is manufactured to high tolerance specifications and is simply superior in overall performance and function. A nylon belt sheath is included.

#### SPECIFICATIONS

# CUSTOM BALI-SONG®

## The Ultimate in Performance

No maker of fine knives is more aware of the varied and demanding requirements placed on their products than we at Benchmade Knife Company. From the discriminating collector who places a premium on fine workmanship, to the sportsman who is concerned with function and dependability, to the martial arts enthusiast who appreciates the physical blend of design, balance and response. We continue the BALI-SONG tradition of combining both high technology and old world craftsmanship to produce the most intriguing knives in the world. Our custom BALI-SONG® knife is handmade to order, sparing no expense. By offering no compromise in its development and production, the Custom BALI-SONG has become recognized as the World's Strongest Folding Knife.

### Custom Series Features

- Completely hand ground satin-finish 440C stainless steel blade, 3/16" thick, heat treated to a Rockwell hardness of 57-59 on the C scale.
- Our three-point locking system incorporates two fully machined stainless steel pivot pins and tang pin, resulting in the strongest folding knife available today.

A selection of custom Bali-Song knives. From far left, clockwise: A special order Ironwood inlay with long clip bowie blade, #CBS110 Skeleton handle with Filipino Kris blade, #CBS120 Cocobolo inlay with Filipino Kris blade, special order black Micarta inlay on aluminum handle with (special order) upswept blade, #CBS112 Cocobolo inlay with bowie blade, special order latchless, stag inlay with spanish bowie blade. Center: CBS106 skeleton handle with scimitar blade.

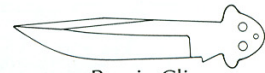

The handles are precision machined from solid bars of 303S cold rolled stainless steel. We handfit the beautiful inlay of your choice. We offer the skeletonized handle version for the ultimate in total function.

Our blades are completely handground from 440C stainless steel. We use heat treating methods developed by the aerospace industry for exceptional edge-holding capability. Our blades are the finest, ground by Benchmade's full-time custom cutler, Jody Samson, a master whose standards others can only hope to duplicate.

### Blade shapes available:

## USA BALI-SONG® Folding Knives

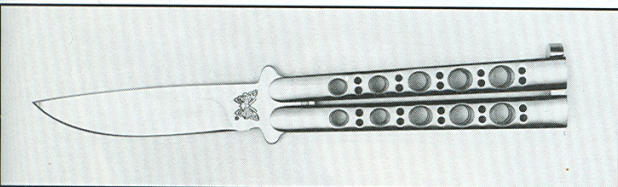

### Benchmade Quality

Benchmade Knife Company was founded by craftsmen committed to building modern, high performance, well conceived knife designs in the U.S.A. that are unmatched in precision, function and value. We take a no-nonsense approach by refusing to include unnecessary bells, whistles or bottle openers that impair the full cutting performance of our knives. We are serious knife makers who produce for the modern knife enthusiast; whether a sportsman, martial arts practitioner, para-militarist, or knife collector.

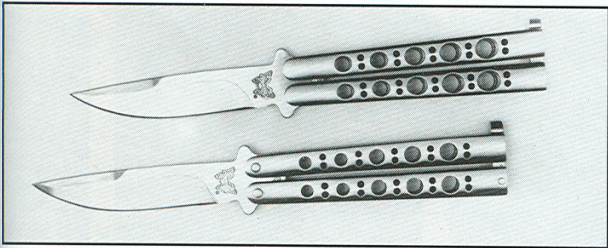

**Back by popular demand . . .** the knives that started it all! We proudly reintroduce our Model 10 and 68 single edge 3 inch all stainless steel butterfly knives. These two models have been sought after by our customers who require single edge blades for close in, delicate cutting tasks. These make perfect bird and trout knives and offer all of the outstanding strength and functionality our products are known for.

The Model 10 features a 3 inch drop point razor sharp blade coupled with our 17-4PH stainless handles. The Model 10 features our standard grade finish with exposed rivet heads.

The Model 68 features the same 3 inch drop point razor sharp blade coupled with our 17-4PH stainless handles in addition to our custom grade deluxe finish.

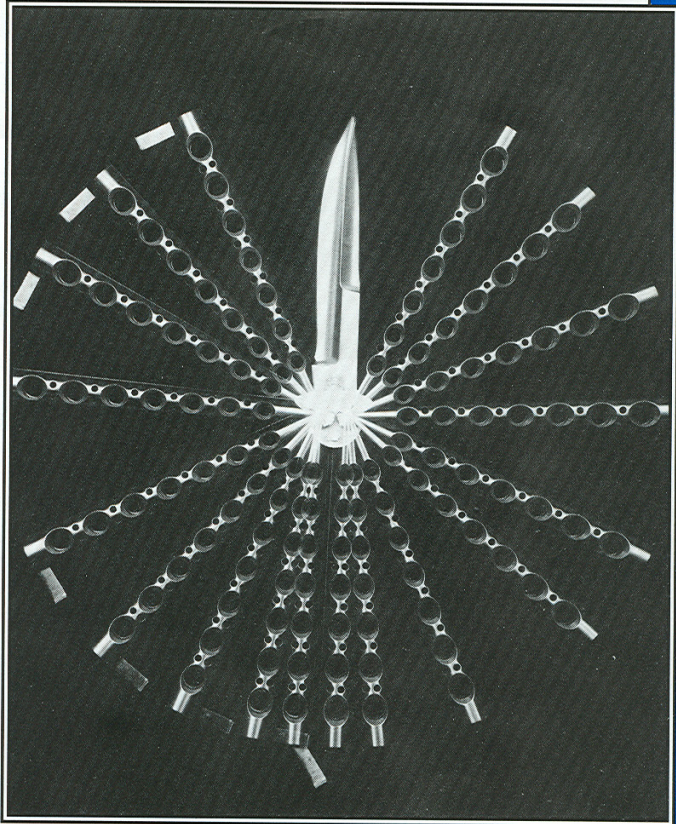

### MODELS 30 and 35

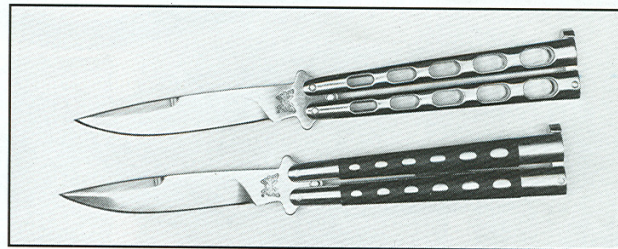

The original and still the BEST 3 inch all-stainless steel butterfly knives available anywhere. Our models 30 and 35 feature our famous 3" Weehawk style blade coupled with investment cast 17-4PH stainless steel handles. They both offer the new classic skeletonized hole pattern introduced on our custom BALI-SONGS. These blades are produced from an American made 425M series High Carbon stainless cutlery steel.

#### SPECIFICATIONS

<b>Blade</b>		Finish	Satin polish
Length	3-1/4"	<b>Length</b>	
Material	425M Stainless steel	Open	7-1/2"
Finish	Mirror polish	Closed	4-1/2"
<b>Handle</b>		<b>Weight</b>	5 oz.
Material	17-4PH stainless steel	<b>Warranty</b>	2 years
		<b>Hardness</b>	Rockwell 57-59 R.C.

Our Bali-Song folding knives are the most dramatic and unique folding knives available. Continually featured in countless television and motion picture productions, they continue to be the most popular action blades available.

### MODELS 239 and 259

These handsome models feature a mirror polished 4" Weehawk style blade coupled to durable diecast ZAMAK handles. The blades are produced from 420 High Carbon steel. The Model 239 features a slotted skeletonized handle design for those who prefer the classic modern look. The Model 259 features black plastic handle inserts for those who prefer traditional styling.

**NEW Models 139 and 159** (not shown): We have reintroduced our popular 4 inch single edge mirror polished drop point blade for those of you that prefer that popular working blade style!

## Delta Raider™ Model 120 Tactical Field Knife

Our efficient S-curve cutting edge is widely acknowledged as the most exciting modern blade design on the market. We have perfected this concept and now offer it to you as a Benchmade Knife.

The S-curve cutting design provides more cutting action and effective edge length than other knives of the same size. Our exclusive double grind reduces weight without sacrificing integrity. It will withstand the harshest conditions found in the field.

Pick it up, it feels right. The contoured Kraton handle is more durable and makes this knife even more tactilely responsive. The Delta Raider is perfectly balanced, properly sized and precisely made. Black leather sheath included.

### SPECIFICATIONS

#### Blade

Length	7 inches
Finish	Polished satin
Material	Special High Carbon stainless steel

#### Handle

Contoured black textured Kraton

#### Length

12 inches

#### Sheath

Top grain cowhide leather

#### Weight

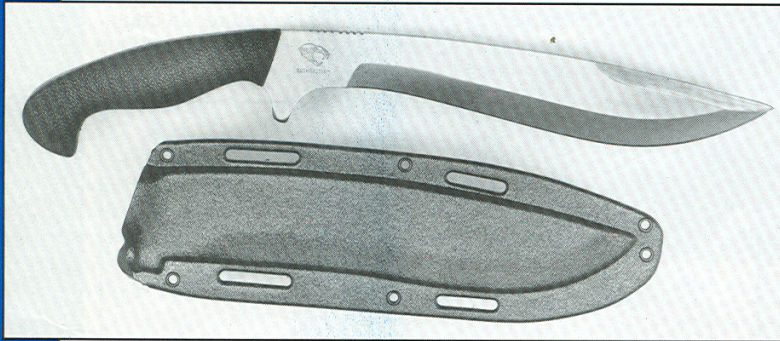

10 ounces

#### Hardness

57-59 R.C., Rockwell

#### Warranty

Limited lifetime

## Bushmaster™ Model 150 Blazing a new path in performance

Acknowledged as one of the finest camp knives ever made. A full bladed blend of the best features seen in the Central American machete, and the Kukri of Nepal. The Bushmaster's 10" blade, with its unique continuous cutting curve, allows you more cutting action. 400 series specially formulated stain resistant steel is ready for hard use in the field. The entire knife weighs just 12.5 ounces and is heralded as the big knife that's not a big burden. Custom thermoformed ABS sheath that's durable, wear-resistant and lightweight.

### SPECIFICATIONS

#### Blade

Length	10 inches
Finish	Polished satin
Material	Specially formulated high carbon 400 series stainless steel

#### Length

14-1/4 inches

#### Handle

Contoured black textured neoprene

#### Sheath

#### Hardness

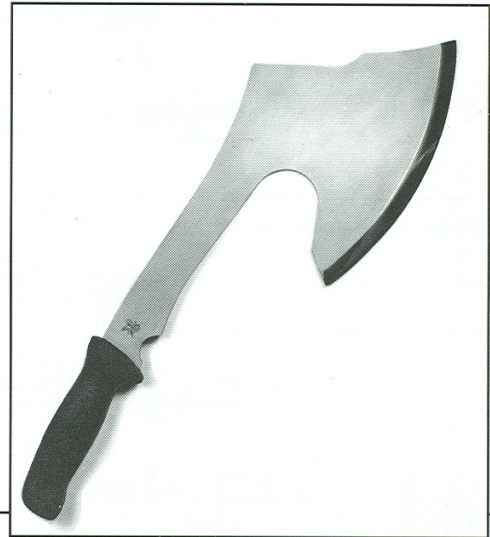

54 R.C., Rockwell

#### Weight

12.5 or 15.8 w/sheath

#### Warranty

Limited lifetime

## Jody Samson's AxCaliber™

The AxCaliber is over seventeen inches in overall length and weighs in at over two pounds. The cutting edge is over eight inches long and is all sweet spot — the whole face is usable. The style was developed a few centuries ago . . . we improved it. Balance, geometric work edge angle, concentration of mass behind the ax edge, modern high carbon steel and a comfortable shock-absorbing handle all merge in this powerhouse.

### SPECIFICATIONS

#### Length

17" O.A.L.; 8" Ax Face Edge

#### Material

Blade - 3/16" thick High Carbon Spring Steel (54 RC)

Handle - Kraton

#### Weight

32.5 ounces

#### Sheath

Premium leather, black
