## **BENCHMADE EARNS 1997 BLADE SHOW HONORS**

Benchmade was the recipient of the Manufacturing Quality Award from the 1997 Blade Show.

This is an especially prestigious award because it recognizes our complete product line, and not just one particular model. We would like to both thank our peers for acknowledging our commitment to quality and our great employees for making it possible. This award truly is a statement of our employees—they are Benchmade, and they make this award possible.

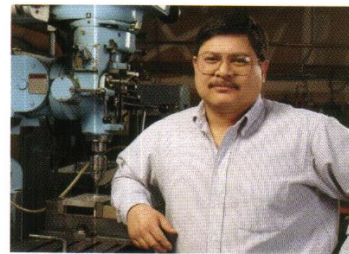

*The Benchmade philosophy is to produce top-quality knives that we, as connoisseurs, would be proud to own and use. We will ensure that every Benchmade knife owner has in their hands the most trustworthy knife found anywhere in the world, and to create an environment in which innovation and excellence rather than production speed is encouraged and rewarded.*

I would like to thank all our many customers who share the same thoughts with us on what qualifies as a great knife. I am especially pleased to announce that our commitment to quality and excellence in addition to our customers recognition of such, is providing us with the means to build a much larger, modern, state of the art facility that will enable us to bring even more exciting cutlery products to market.

Our success is the result of pushing the envelope on modern designs, materials, processes and mechanisms. But most importantly, it is a direct result of the dedication to quality and craftsmanship of the people who are Benchmade! I am very proud of the growth, personal improvement, and constant awareness of the team spirit embraced by all our employees. It is this "team spirit" that provides for our ability to work together, using the most difficult to manufacture materials, and continually produce knives that we are proud to own and use. Knives that we all agree are as special and hardworking as the people who made them!

Les De Asis  
*Benchmade President*

## BENCHMADE COMMITTED TO QUALITY

At Benchmade we are involved in the design and manufacture of every component of our knives. We have found that if we want it done right, we must do it ourselves. We do it all in-house, utilizing the newest technology available including laser cutting to tolerances of .0005", CNC machining, screw machining and computerized inspection equipment. Another result is our proprietary blade coating called BT2™ for salt water corrosion resistance. This new BT2 coating far exceeds the ASTM-117 specifications and we feel that for our knives which may be exposed to salt-water, this new coating is our best ever. All this effort is necessary to ensure that our total quality manufacturing is held to a higher standard, enabling us to produce the knives worthy to be branded Benchmade.

## CUSTOM-DESIGNED KNIVES WITH A TECHNOLOGICAL EDGE

The Benchmade Designer Series is built on a foundation of respect for the custom knife maker. We applaud the talent, the passion and the dreams, of top-notch makers, men who conceive and create one knife at a time. But at Benchmade our goal is to make those dreams attainable realities— realities that can be held, used and trusted by everyone. That's because Benchmade creates man's oldest tool using man's newest technology. Our close association with the world's premiere custom knife makers who are constantly exploring new locking designs, materials and processes assures our customers that Benchmade products truly define state of the art. From screws and rivets to the latest in laser technology, every component and every piece of equipment is made or adapted to fit our unrelenting production standards. If the right machine to do the job does not exist, we make it. This is the level of our persistence and determination in the pursuit of quality. The result is a custom-designed knife with the soul of the original— coupled with the precise character of high-technology unequalled in our industry. Demand the best. Demand Benchmade.

# BENCHMADE SENTINEL™ MODEL 875

The Model 875 Sentinel was designed by rising star Allen Elishewitz, and is based on Allen's very successful Phantom design. This knife has a 3.75" spear point ATS-34 blade. This knife, with its liner lock design, also features double titanium liners that are anodized blue as well as a 2-piece scale design of hard black anodized 6061-T6 aluminum. When combined with the black scales, the blue liners give the knife a very upscale, non-threatening look. A black pocket-clip is attached for clip-carry and a very unique lanyard attachment point is integrated for those that prefer its use. The Sentinel is available with a plain or ComboEdge blade in satin finish or with our proprietary BT2 coating.

## MODEL 875

<b>Blade</b>	
Length	3.75"
Thickness	0.120"
Material	ATS-34 stainless steel
Hardness	59-61 HRC
<b>Overall Length</b> 8.60"	
<b>Size Closed</b> 4.875"	
<b>Handle</b> Black anodized aluminum over blue anodized titanium	
<b>Lock Mechanism</b> Titanium locking liner	
<b>Weight</b> 3.7 oz.	
<b>Warranty</b> Limited lifetime	
Model 875	Satin finish blade with plain edge
Model 875S	Satin finish blade with ComboEdge
Model 875BT	BT2 coated blade with plain edge
Model 875SBT	BT2 coated blade with ComboEdge

# BENCHMADE STRYKER™ & MINI STRYKER

Designed by Allen Elishewitz, the Stryker features a 3.7" ATS-34 drop point Tanto blade. The double, titanium liners are housed in G-10 scales and a black pocket-clip is featured on the reverse side of the knife. This knife, with its conventional double bevel, is designed for people who like the features of the Tanto blade shape, but do not want a chisel ground blade. The blade is offered in plain or ComboEdge with either satin finish or our BT2 coating. An ambidextrous opening disk provides quick, easy, one-handed functioning.

The new Model 905 Mini Stryker is a smaller version of the 910. The blade is 2.9" which makes this the smallest model with the Tanto style blade that we have ever offered. You get all the same full-size features and performance in a smaller package.

## **MODEL 905**

<b>Blade</b>	
Length	2.90"
Thickness	0.100"
Material	ATS-34 stainless steel
Hardness	59-61 HRC

Model 910BT	BT2 coated blade with plain edge
Model 910SBT	BT2 coated blade with ComboEdge
Model 910SBT LH	BT2 coated blade with ComboEdge, left handed

# BENCHMADE THE MEL PARDUE KNIVES

The new Model 330 was designed by Mel Pardue to appeal to our customers who had requested a smaller "gentleman's" pocketknife. With a "thinness" of .350" and a closed length of only 3.4", it's the smallest and lightest knife we have ever offered. A very classy, no frills knife fit equally well for blue jeans or black ties.

The Model 850, from its rainbow anodized titanium bolsters and liners to its ivory Micarta scales and premium ATS-34 blade steel— this hand finished design looks every bit the custom knife that it truly is.

The new Model 350 is a lightweight, molded handle, liner lock version of our best selling Model 3500 auto, also designed by Mel Pardue. The satin finished spear point blade is 2.9" long, heat-treated ATS-34 stainless steel. It features a thumb stud for easy one-handed functioning and sports a pocket-clip for accessibility.

## **MODEL 330**

<b>Blade</b>	
Length	2.30"

<b>Weight</b> 4.2 oz.	
<b>Warranty</b> Limited lifetime	
Model 650	-Blk Plain edged blade, black anodized handle
Model 650S	-Blk ComboEdged blade, black anodized handle

# BENCHMADE AFCK & MINI AFCK

The AFCK (Advanced Folding Combat Knife) was designed in conjunction with a former SEAL operator. The efficiencies in design and superior materials bode well for an excellent outdoorsman knife. All models feature utility ground blades of ATS-34 steel heat-treated to 59-61 HRC which means, "It holds an edge!". Blades come in plain, ComboEdge, or full-serration; in satin finish or with our exclusive BT2 coating for durable corrosion protection. The AFCK and the Mini feature bead blasted G-10 scale handles for positive grip in all weather conditions. Ambidextrous opening holes (licensed by Spyderco®), and some models offer a true left handed configuration. All knives come with a black, stainless steel pocket-clip for ease of carry and versatility.

You get the benefit of all the custom knife features, materials and quality at a price nobody can match.

## MODEL 800

<b>Blade</b>	
Length	3.90"
Thickness	0.125"
Material	ATS-34 stainless steel
Hardness	59-61 HRC
<b>Overall Length</b> 9.00"	
<b>Size Closed</b> 5.30"

Model 812SBT	BT2 coated with ComboEdge
Model 812SBT LH	BT2 coated with ComboEdge, left handed

# BENCHMADE ASCENT™ SERIES

The first knife in the series was the Model 830 with a 3.5" blade. The newest additions to the family are the Model 820, with a 2.9" blade and the model 840 with a 3.9" blade. All models feature utility ground blades of ATS-34 steel heat-treated to 59-61 HRC. All models are available in plain or ComboEdge in satin finish or with our exclusive BT2 coating.

The Ascent models have a number of features that set them apart from other lightweight knives. Some of those features include Zytel® handles and black, stainless steel pocket-clips which may be moved from the pivot end to the butt end on the Model 830 and 840. Ambidextrous opening holes (licensed by Spyderco®), and stainless steel inserts for pocket-clip screws. The pivot screws are also stainless steel and are approximately twice the size as most other lightweight knives.

## MODEL 820

<b>Blade</b>	
Length	2.90"
Thickness	0.105"
Material	ATS-34 stainless steel
